

## **Connecting to a Cloud Session on a MAC**

To connect to your remote session, you will need to get and install the Microsoft Remote Dektop Connectop app from the iTunes store (it is free). Get version 10.x or above. The following provides the basics for getting this connection set up.

- 1. Download and install the Microsoft Remote Desktop App from iTunes or App store.
- 2. Open the Microsoft Remote Desktop App, possibly using Finder to do so to see the window shown on the left below.

	Microsoft Remote Desktop	• • •	Edit Remote Desktops -
	New Start Edit Preferences Remote Resources Azure RemoteApp	General Session	Redirection
	(Q		
		Connection name	
3.	Click New to bring up the next screen show	n to PC name	Host name or IP address
4	the right.	Gateway	No gateway configured
4.	Type WINSearch Remote Connection to	r the Credentials	
	you want to use.	User name	Domain\user
5.	Type <b>mycloud.winsearch.com</b> as the PC	Name Password	Password
	entry.		
6.	Enter the domain and username in the User	name Resolution	Native
	box as follows:	Colors	True Color (24 bit)
	WinSearchASP\XXXJDoe	Full screen mode	OS X native
			Start session in full screen
	Domain \ and not / 3 letters for name company, name initia	r your first ıl,	Use all monitors
	your last n	ame	

- 7. Type your password in the Password box.
- 8. Click on Session at the top then select Forward Printing Devices

9. Click the red close button in the upper left corner to close this dialog box. Now you set up connection looks like this:

10. When you see any Verify Connection dialog boxes like one of the ones shown below, click Continue.

11. Now you are connected.
